Turbocharger speed measurement

turboSPEED DZ140

-  Speed range from 200 to 400,000 rpm
-  Miniature sensor $\varnothing 3$ mm
-  Measuring aluminum and titanium
-  Large distances up to 2.2 mm
-  Highest immunity to interference
-  Sensor operating temperature up to 285 °C

Measuring principle

A coil integrated in the sensor housing is energized by a high-frequency alternating current. The emerging electromagnetic field changes when approaching a turbo charger blade. This is how every blade generates a pulse. The controller identifies the rotational speed (analog 0 - 5 V) by considering the number of blades.

Robust miniature controller

As the entire controller is in a sealed miniature housing and designed for ambient temperatures up to 115 °C, the controller is easy to integrate into the engine compartment. The turboSPEED DZ140 offers excellent interference resistance for increased EMC requirements as well as in test cells and road tests.

Engine compartment application

The DZ140 eddy current measuring system is resistant to oil and dirt. This is a key advantage especially compared to optical speed measuring systems, as this immunity helps to achieve high precision measurements on a continuous basis.

Ease of use

A tri-color 'status' LED on the controller indicates when the sensor has reached the ideal distance from the turbocharger blades. This simple feature enables greatly reduced installation time. As the sensor is connected with the controller via a special BNC connector, it is therefore downward compatible with all previous sensor models. An industrial push-pull connector guarantees a reliable connection between the controller and the power supply as well as the analog outputs.

Measuring aluminum and titanium blades

The DZ140 measures both aluminum and titanium blades. The sensors can be mounted at a relatively large distance from the blade. The maximum distance of 2.2 mm enables reliable operation.

Extremely compact design

Large measuring distances both on aluminum and titanium

Axial installation

Radial installation

Model	DZ140	
Resolution	10 bits	
Speed range (measuring range)	200 ... 400,000 rpm	
Linearity	< $\pm 0.2\%$ FSO	
Target material	aluminum or titanium	
Supply voltage	9 ... 30 VDC (short-term up to 36 VDC)	
Max. current consumption	50 mA	
Digital output	TTL level (1 pulse / blade with variable pulse duration or 1 pulse / rotation with 100 μ s pulse duration)	
Analog output	0 ... 5 V ¹⁾	
Connection	Sensor: triaxial connector; Supply/signal: 10-pole connector, raw signal: coaxial connector (cable see accessories)	
Mounting	Screw connection with 4 through-holes	
Temperature range	Storage	-40 ... +125 °C
	Operation	-40 ... +125 °C
Protection class (DIN EN 60529)	IP65 (plugged)	
Weight	approx. 85 g	
Number of blades	adjustable via rotary switch accessible from outside for 1 to 16 blades	

FSO = Full Scale Output (speed range)

¹⁾ Rotational speed adjustable via mode rotary switch

Controller DZ140

Dimensions in mm, not to scale.

Pin assignment for power supply and signal

Pin	Assignment	Color (cable: PC140-x)
1	Analog output for rotational speed 0 ... +5 V	Blue
2	reserved, not connected	Yellow
3	TTL pulses, digital	Green
4	reserved, not connected	-
5	GND	Black
6	reserved, not connected	-
7	Supply -	White
8	Supply voltage +9 ... 30 VDC	Brown
9	Not assigned	-
10	Not assigned	-

 10-pin cable connector

Cables

turboSPEED DZ140

Connection cables for DZ140 portfolio sensors

Miniature coaxial cable for DS05(x) and DS1 models

Diameter: approx. 3.5 mm

Sheathing: thermal protection fabric hose (polyolefin shrink hose)

Temperature range: -50 °C to +200 °C (static)

Minimum bending radius: static approx. 18 mm / dynamic approx. 35 mm

Connection: BNC socket coaxial

Miniature coaxial cable for DS1(04) models

Diameter: approx. 6 mm

Sheathing: metallic protective hose (stainless steel)

Temperature range: -50 °C to +200 °C (static)

Minimum bending radius: static approx. 30 mm / dynamic approx. 60 mm

Connection: BNC socket coaxial

Protection class: IP 40

Triaxial cable for the DS1/T models

Diameter: approx. 3.5 mm

Sheathing: thermal protection fabric hose (polyolefin shrink hose)

Temperature range: -50 °C to +200 °C

Minimum bending radius: static approx. 18 mm / dynamic approx. 35 mm

Connection: BNC socket triaxial
